Being a kid in today’s world is more complicated than ever. NewBridge recognizes that the most successful children are those who receive guidance and support as they grow. NewBridge offers programs that empower young people to make good decisions in life and feel good about themselves.

NewBridge programs are focused on strengthening positive coping skills and building resiliency in today’s youth. A lack of these skills can lead to high risk-behaviors. Positive coping skills can provide today’s youth the power to control their stress and handle upsets.

NewBridge offers a full complement of services and programs for children, parents and educators.

About NewBridge
Founded in 1963, NewBridge Services, Inc. is a non-profit community organization providing innovative programs and education services in five areas: mental health, substance abuse, housing, children’s needs and senior citizen assistance. Whether guiding people as they cope with stress, grief, or substance abuse, or providing advice to those with parenting, relationship or caregiving challenges, NewBridge helps people bring balance to their lives.

40 Developmental Assets®
All NewBridge prevention programs encompass the philosophy of Search Institute’s 40 Developmental Assets®, which are experiences and qualities essential to success, including boundaries, relationships, support, positive values, productive use of time, positive identity, empowerment and more. These assets have the power to influence choices that young people make on their path to adulthood.

“Studies of more than 2.2 million young people consistently show that the more assets young people have, the less likely they are to engage in a wide range of high-risk behaviors and the more likely they are to thrive.”
